Introduction

CreatorMoon Token (\$CMOON) was Created with the sole purpose of Supporting the individuals who want to build their career as a content creator. Building a brand from the ground up that stands out is not easy with the current competition however it is still possible with a supportive ecosystem.

That is why CreatorMoon was introduced.

CreatorMoon is a Utility Token designed to access the services of our Creator Based Ecosystem.

Three Main Services of CreatorMoon

- CreatorClub
- Builder Program
- Dapps. (In Development)

Further A portion of every single transaction goes to various charity programs to make the world a better place.

Our Vision

To Make Aspiring Creators using the power of Cryptocurrency.

Core values of CreatorMoon

- Community
- Loyalty
- Collaboration and partnership
- Innovation
- Charity
- Sustainability

Founders Behind Creator Moon

We have multi-talented people onboard from around the world but due to a lot of scammer attacks and identity thefts our identities will be anonymous **for now** just like most projects in BSC. However, **we will Reveal our identity for strategic partnerships and audit compliances.** We believe this will build more confidence with our community even though we work anonymously.

We strongly believe that we have the right talents for now. However, as we grow, we will expand our Team.

Our team consists of Tech Entrepreneurs, Crypto Investors, Software engineer, Blockchain developer, Graphic designer and Youtubers.

We will publish the team as soon as we finish our Recruitment process.

\$CMOON Holders' Benefits

- Get priority in Creator Club application process.
- We reward holders with 5% transaction tax.
- Special Giveaway to the holders.
- Voting Power to select Creators and Charities.
- Access to Our Future DApps.

Why Content Creators Matter

As you all know, in the modern world you no longer need a college degree to say that you are good at something. All you need is a good story, because people tend to trust transparency and individuality over something else. It is no longer the degree you hold but the stories you tell the world.

Why Most of the Content Creators fail

- Fail to build Momentum.
- Lack of Motivation.
- Run out of Video ideas.
- Cannot afford to make videos they love.
- Lack of Knowledge about storytelling, platforms, editing etc.

What We are doing

We are building an ecosystem where we can empower aspiring content creators by helping them to make sustainable living through their craft.

Investors are also Rewarded for holding CreatorMoon tokens.

Further, we also donate a significant amount to the selected charities around the world.

In the future we will be developing Dapps that Connect businesses with Creators. (\$CMOON Tokens will be required to access the platform.)

What is Creator Club

It is an exclusive community of aspiring Content Creators.

Benefits

- Access to Premium Contents of Top Creators
- Collaborate with Other Creators of the Club
- Exclusive Access to online workshops of top Creators
- Special Giveaways

CreatorMoon Ecosystem

CreatorMoon Token

CreatorMoon (\$CMOON) is a BEP20 Token issued on Binance Smart chain with a total fixed supply of 1 quadrillion (10¹⁵) tokens. CMOON Token was created with the purpose of helping aspiring Content Creators all around the World. This Token will be entered for the pre-sale campaign, which was hosted by DxSale, a decentralized, cross chain, token management platform as a service. Further, CreatorMoon's initial liquidity pool is going to be locked under DxSale's DeFi Launch Certified Liquidity Locker, ensuring safety and security for our community.

Binance Smart Chain

Binance Smart Chain (BSC) is known as a blockchain that runs parallel to the Binance Chain. Unlike Binance Chain, BSC boasts smart contract functionality and compatibility with the Ethereum Virtual Machine (EVM). Since BSC is EVM-compatible, it is launched with support of the rich universe of Ethereum tools and DApps. In theory, this makes it easy for developers to port their projects over from Ethereum. For users, this means that applications like MetaMask can be easily configured to work with BSC. Also, the main advantage of issuing on the BSC is that it offers affordable blockchain experience for our community compared to ETH transaction fees.

PancakeSwap

PancakeSwap is a decentralized exchange (DEX) built on Binance Smart Chain for Swapping BEP-20 Tokens. Once the presale ends, DxSale automatically lists \$CMOON on PancakeSwap. Then pancakeswap provides the facility to trade \$CMOON token on their platform. However, \$CMOON will be listed on other major exchanges as well.
